

- The plastic can gives traditional products a new and modern image and offers the following features
- Plastic cans are rust proof and unaffected by climate change
- Parallel sides gives the plastic can greater stacking
- Plug type lever lids can be easily opened with a screwdriver or similar tool and resealed repeatedly with a “click” which can be heard clearly
- Plastic strap handles which are broad and neat
- Polypropylene material makes the plastic can shock and vibration resistant so it will not dent like a metal can
- Plastic cans were originally designed for emulsion paints but can be used as an alternative to other forms of packaging in many areas such as mastic’s, resins, adhesives, chemicals and food products
- 1 to 5 litre white cans are available ex-stock

size	colour & material	height	width	weight (inc lid)	pallet qty
1 litre	white polypropylene	122mm	114.3mm	67.3g	900
2.5 litre	white polypropylene	160.9mm	156.4mm	186.6g	343
5 litre	white polypropylene	234.6mm	178.2mm	301g	180
